

On-board cameras IDM season 2022

According to Art. 9 of the IDM Sporting Regulations, only on-board cameras accepted by the series organizer may be used.

In the upcoming season, the use of on-board cameras in the free practices are optional for all riders generally. The proper fixation must be approved by the scrutineering.

On-board cameras are no longer allowed from the 1st qualifying practice up to the end of the event, except cameras deployed by the Broadcaster. The produced video material will be made available to the corresponding rider, if required, at the end of the event.

Hence, requests for using of on-board cameras are no longer necessary.
